The notifying parties may submit, from the moment the written notification is filed and until one day after the concentration is scheduled for a Board of Commissioners session, proposed conditions to avoid hindering, damaging or impeding the process of economic competition and free market access as a result of the concentration.

---

**Article 92.** Upon notification of the concentration, the Economic Agents may expressly request that the procedure be conducted pursuant to this article, for which the notifying parties shall bring forth to the Commission information and the corresponding elements of conviction that clearly demonstrate that the concentration will not hinder, damage or impede free market access and economic competition, in terms of this article.

It is clear that a concentration does not have as its purpose or effect to hinder, damage or impede free market access and economic competition, when the acquiring party has no participation in markets related to the relevant market in which the concentration takes place, or is not an existing or potential competitor of the acquired party and, in addition, any of the following circumstances concur:

- I. The transaction implies the participation of the acquiring party in the relevant market for the first time. Consequently, the relevant market's structure shall not be modified and will only involve the total or partial substitution of the acquired Economic Agent by the acquiring party;
- II. - III. The party acquiring stock, partnership interest or participation units has the control of a company and increases its relative participation in the company's capital structure, or
- IV. In the cases provided for by the Regulatory Provisions.

The notification of a concentration under the procedure established in this article shall be made in writing and shall contain the information and documentation referred to in subsections I to XII of article 89 of this Law.

Within the five-day period following reception of the concentration notification, the Commission shall issue its decision on its admissibility, or, pursuant to the last paragraph of this article, order its inadmissibility and for the case to be processed under article 90 of this Law.

The Board of Commissioners shall resolve whether the concentration complies with the criteria of clearly not hindering, damaging or impeding free market access and economic competition, as foreseen under this article, within a period no greater than fifteen days following the admissibility decision. Upon conclusion of said timeframe without the Board of Commissioners issuing a resolution, it shall be understood that there is no objection to the concentration.

When the Commission considers that the concentration does not fall under the criteria of subsections I to IV of this article, or the information provided by the Economic Agent is incomplete, the Commission shall issue a decision for processing the case under article 90 of this Law.

- I. When the transaction involves a corporate restructure, in which the Economic Agents belong to the same economic interest group and no third entity participates in the concentration;
- II. When the holder of stock, partnership interest or units of participation increases its relative participation in a company's capital stock which it has controlled since its incorporation or commencement of operations, or, when the Board of Commissioners had previously authorized the acquisition of such control and the former then increased its relative participation in the capital stock of the referred company;
- III. When the transaction concerns the incorporation of a management, guaranty or any other sort of trust, whereby the Economic Agent transfers its assets, stock, partnership interest or participation units without the purpose or necessary consequence of transferring said assets, stock, partnership interest or participation units to a company other than both the trustor and the corresponding fiduciary institution. - V. When the acquiring party is a variable income investment company and the transaction has as its purpose the acquisition of stock, obligations, assets, securities or documents with resources resulting from the placement of the investment company's shares among the investing public, except if as a result or because of the transactions, the investment company may have significant influence over the decisions of the Economic Agent involved in the concentration;

- 
- VI.** In the acquisition of stock, assets, titles or the representative documents of the capital stock of companies or whose underlying assets represent equity of legal entities, and which are traded on stock exchanges in Mexico or abroad, when the act or sequence of acts does not entitle the purchaser to own ten percent or more of such capital stock, obligations convertible into stock, assets, securities or documents, and the acquirer does not have the powers for:
- a.** Appointing or removing members of the board, directors or managers of the issuing company;
  - b.** Imposing, directly or indirectly, decisions on the general meetings of stockholders, partners or equivalent bodies;
  - c.** Holding ownership rights that allow, directly or indirectly, to exercise voting regarding ten percent or more of a legal entity's capital stock, or
  - d.** Directing or influencing, directly or indirectly, the management, operation, strategy or the main policies of a legal entity, by means of equity holdings, contractually or otherwise.
- VII.** When the acquisition of stock, partnership interest, participation units or trusts is performed by one or more investment funds merely for speculation purposes, and which do not have investments in companies or assets that participate or are employed in the same relevant market as the Economic Agent involved in a concentration, or
- VIII.** In any other case established by the Regulatory Provisions.

### *Chapter I*

#### *Investigations to Determine Essential Facilities or Barriers to Competition*

**Article 94.** The Commission shall commence either ex-officio or per request of the Federal Executive Branch, directly or through the Ministry, the investigation procedure when there are elements suggesting there are no effective competition conditions in a market and aiming to determine the existence of barriers to competition and free market access or of essential facilities that could generate anticompetitive effects, which shall be conducted pursuant to the following:

- I.** The Investigative Authority shall issue the initiation decision and shall publish its extract in the Federal Official Gazette, which shall identify the market subject to the investigation with the purpose of allowing any person to provide elements during the investigation. The investigation period shall commence on the date on which said extract is published, and shall not last less than thirty or exceed one hundred and twenty days. The investigation period may be extended by the Commission for as much as two additional periods in case there are causes that justify such action;

- II.** The Investigative Authority shall have all the investigation powers provided for by this Law, including requiring the necessary reports and documents, summoning and performing interviews with the individuals or undertakings related to the case in question, conducting on-site inspections and ordering any proceeding considered adequate. When referring to essential facilities, the Investigative Authority shall analyze, throughout the investigation, all of the criteria under article 60 of this Law;
- III.** Upon conclusion of the investigation and if there are sufficient elements to determine that there are no effective competition conditions in the investigated market, the Investigative Authority shall issue, within the following sixty-day period after concluding the investigation, a preliminary investigative opinion; otherwise, it shall propose the closing of the case file to the Board of Commissioners.

When issuing the preliminary investigative opinion, corrective measures deemed necessary to eliminate the restrictions to the efficient operation of the investigated market shall be proposed, for which the Investigative Authority may request, if applicable, a non-binding technical opinion from the sector's coordinating public entity or the corresponding Public Authority regarding said corrective measures.

If the case may be, the preliminary investigative opinion shall be notified to the Economic Agents that may be affected by the proposed corrective measures, including the possible barriers to competition or the regulation on access to an essential facility, as well as, if the case may be, to the sector's coordinating public entity or to the corresponding Public Authority;

- IV.** The Economic Agents with legal standing in a determined matter may assert the arguments available to them under the law and bring before the Commission the evidentiary means they deem pertinent, within the forty five day period following the date on which the corresponding notification has taken effect. Upon expiration of said period, a decision shall be issued if the case may be, regarding the dismissal or admission of evidentiary elements, as well as the place, time and hour for their processing;
- V.** Once evidence has been processed, and within the following ten day period, the Commission may order the submission of further evidentiary elements, or summon for closing arguments, in terms of the following subsection;
- VI.** Upon conclusion of the submission of further evidentiary elements, the Commission shall set a period, not exceeding fifteen days, for the written formulation of closing arguments, and
- VII.** The file shall be considered completed upon expiration of the period for the written formulation of closing arguments. The involved Economic Agent may propose to the Commission, only once, suitable and economically feasible measures to eliminate the competition problems identified at any moment until the file is completed.

---

Within five-days following the reception of the written proposal of measures referred to in the previous paragraph, the Commission may request that the Economic Agent, if the case may be, submit the corresponding clarifications in a five-day period. Within ten days following the reception of the written proposal or clarifications thereof, as the case may be, an opinion shall be submitted before the Board of Commissioners, which shall resolve upon the Economic Agent's proposals within the following twenty days.

In case the Board of Commissioners refuses the Economic Agent's proposal, it shall justify its decision and the Commission shall issue, within five days, the decision reinstating the procedure.

Upon completion of the file, the Board of Commissioners shall issue the corresponding resolution within a period no greater than sixty days.

The resolution of the Commission may include:

**a.** Recommendations to Public Authorities.

The resolutions in which the Commission determines the existence of legal provisions that unduly impede or distort free market access and competition in the market, shall be notified to the competent authorities, for these to act accordingly pursuant to their scope of jurisdiction and under the procedures provided for in the laws in force. These resolutions must be published;

- b.** An order to the corresponding Economic Agent to eliminate a barrier that unduly affects free market access and the competition process;
- c.** The determination on the existence of essential facilities and guidelines to regulate, depending on the case, the access modes, prices or rates, technical and quality conditions, as well as the implementation schedule, or
- d.** The divestiture of the involved Economic Agent's assets, rights, partnership interest or stock, in the necessary proportions to eliminate the anticompetitive effects, shall proceed when other corrective measures are not sufficient to solve the identified competition problem.

The resolution shall be notified, depending on the case, to the Federal Executive Branch and the corresponding sector's coordinating entity, as well as to the affected Economic Agents, and shall be published in the Commission's media outlets and its relevant information in the Federal Official Gazette.

If the party holding title over the essential facility considers it no longer meets the requirements to be considered as such, it may request the Commission to initiate the investigation established under this article, with the purpose of determining if such requirements are still being met.

If the Commission thereby determines that the good or service does not meet the requirements to be considered an essential facility, the Commission's prior resolution regulating access thereof shall cease to have legal effect, effective from that moment.

The resolution pertaining to the divestiture of assets referred to in this article does not constitute the sanction referred in article 131 of this Law.

In all cases, the Commission shall verify that the proposed measures will generate efficiency gains in the markets, consequently these measures shall not be imposed when the Economic Agent with legal standing in the procedure demonstrates, in due course, that the barriers to competition and essential facilities generate efficiency gains and have a favorable impact on the economic competition process and free market access, thus overcoming their possible anticompetitive effects, and resulting in an increased consumer welfare. Among the gains in efficiency for consideration are those which result from innovation in the production, distribution, and marketing of goods and services.

**Article 95.** The resolutions whereby the Commission determines the existence of barriers to competition and free market access or essential facilities shall be notified to the corresponding sector regulators in order for them to determine, within the scope of their jurisdiction and according to the procedures provided in the current legislation, the actions to achieve competition conditions.

When the Commission becomes aware of acts or general regulations issued by a State, the Federal District or a Municipality, which could contravene articles 28 and 117, subsections IV, V, VI, and VII of the Political Constitution of the United Mexican States, among others, or that violate powers of the Federation, it shall notify such circumstance to the head of the Federal Executive Branch, through its Legal Advisor, so he/she files a constitutional controversy if deemed pertinent, or to the competent entity for the same purpose.

The Commission shall express its motives for considering that the general acts or regulations mentioned in the previous paragraph contravene the constitutional provisions.

In case the Federal Executive Branch considers that the initiation of a constitutional controversy is not pertinent, the Legal Advisor shall publish the reasoning behind this decision.

In case that the Commission becomes aware of acts or general provisions issued by a constitutional autonomous entity, Congress, or the Federal Executive Branch, which encroach upon its powers, it may lodge a constitutional controversy in the terms established in subparagraph 1, of subsection I, of article 105 of the Political Constitution of the United Mexican States.

The Commission shall require submission of the necessary reports and documents and summon the related individuals for compulsory interviews;

- V. Upon conclusion of the corresponding investigation, and if there are elements to determine the existence of substantial market power, or the absence of effective competition conditions, or other analogous terms, the Commission shall issue a preliminary opinion within a thirty-day period from the issuance of the decision to conclude an investigation. Its extract shall be published on the Commission's media outlets and the opinion's relevant data shall be published in the Federal Official Gazette;

- VI.** The Economic Agents that prove their standing concerning the matter before the Commission, may thereby assert their rights and bring forth the means of conviction deemed pertinent, within twenty days following the publication of the preliminary opinion's relevant data in the Federal Official Gazette;
- VII.** Within ten days following the expiration of the timeframe provided in the previous subsection, the dismissal or admissibility of the evidentiary elements shall be decided upon; likewise, the place, date and time for evidence processing shall be defined;
- VIII.** Processing of evidentiary elements shall be conducted within a period not exceeding twenty days from their admission;
- IX.** The file will be considered as completed once evidence has been processed or the corresponding period has expired, and
- X.** Once the file is completed, the Commission shall issue a resolution or opinion within a maximum period of thirty days, which shall be notified, if the case may be, to the Federal Executive Branch and to the corresponding sector's coordinating entity and published on the Commission's website as well as its relevant data in the Federal Official Gazette. The foregoing, so that, if the case may be, the corresponding sector's coordinating entity may establish the regulation and the corresponding measures, for which it may request a non-binding opinion from the Commission.

The Commission may extend the timeframes established under subsections IV, VIII and X of this article only once and for an equal period under duly justified circumstances.

**Article 97.** In the case of article 9 of this Law, the Commission may issue an opinion per request of the Federal Executive Branch, which shall be processed in terms of the previous article, except in cases where priority attention is requested, in which case the Commission shall issue the opinion as soon as possible, considering the timeframes provided by this Law.
